Secondary intakes

- All NFD pumps have gated wyes on the officer side pump panel. Gated wyes can receive additional intake lines for maximum pumping capacity or can be used to draft with the 2 ½ inch hard suction hose.

Auxiliary intake

- All NFD pumps have an auxiliary gated intake – this intake is locate just below and to the right of the master intake
- The auxiliary gated intake is labeled "auxiliary suction" or "intake". It can be used as an additional intake into the pump or can be used to draft using the 2 ½ inch hard suction hose.
