

Scenario Number 2

At 10:50 p.m., you are dispatched to an incident on a busy highway. Due to heavy traffic, your response is slowed. Arrival time is logged at 11:00 p.m. Upon arrival you find a tanker that is leaking. You notice this placard on the rear of the tank. Given the situation above and using an ERG, answer the following questions:

23. According to the ERG, what is the name of the material identified on the placard?
- a) Toxic Liquid, n.o.s.
 - b) Asphalt
 - c) Barium
 - d) Nitric Acid
24. According to the ERG, which best describes the initial emergency action to be taken by the hazardous materials responder as indicated in the **PUBLIC SAFETY** section of the guide page?
- a) Contain the product by constructing a dike around the spill.
 - b) Isolate spill or leak area for at least 150 feet in all directions.
 - c) Move immediately to the lowest point in the vicinity.
 - d) Stay downwind.
25. According to the ERG, which best describes the **HEALTH** hazards associated with this product?
- a) Runoff from fire will not cause pollution.
 - b) Liquids are lighter than water.
 - c) Contact with molten substance may cause severe burns to the skin and eyes.
 - d) Vapors may cause disorientation.
26. According to the ERG, which best describes the appropriate action to be taken under the section dealing with **SPILL OR LEAK**?
- a) Do not stop leak.
 - b) Entry into waterways, sewers, basements will not pose a danger.
 - c) Flood area with water from a distance.
 - d) Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area).
