

## *Training for Essex County*

Name:

Date:

### **LDH 1: Hydrant with steamer available** **Performance / Task description**

1. Remove 4-inch supply line from bed of truck.
2. Remove Hydrassist Valve and Hydrant Bag from compartment
3. Bring proper tools ie... radio, hydrant wrench, two spanners
4. Wrap hydrant properly by creating an "X" around the backside of the hydrant leaving sufficient amount of hose to make connection.
5. Signal vehicle operator move forward while standing on hose at the "X".
6. When appropriate, unwrap hose from the hydrant.
7. Loosen Steamer cap and 2 ½ inch caps then place hydrant wrench on stem.
8. Remove caps and place them at rear of hydrant.
9. Attach Hydrassist Valve to hydrant with the handle toward outlet "B" labeled **"TO FIRE"**
10. Attach Morse gates in the closed position.
11. Attach 4-inch supply line to Hydrassist valve outlet "B" labeled **"TO FIRE"**.
12. Request permission to charge hydrant.
13. Open hydrant fully and correctly.
14. Retrieve tools and rejoin crew; checking couplings along the way.
