

Basic knot terminology

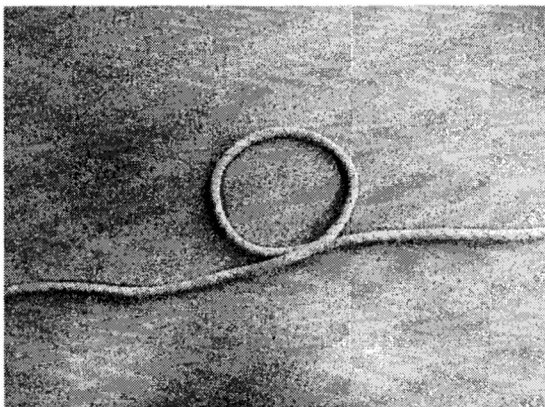

- Working end – the part of the rope used for forming the knot
- Running end – the part of the rope used for lifting or hoisting
- Standing part – the part of the rope between the working end and the running end
- Bight – formed by reversing the direction of the rope to form a U bend with two parallel ends.
- Loop – formed by making a circle in the rope
- Round turn – formed by making a loop and then bringing the two ends of the rope parallel to each other

A bight of rope

A round turn

A loop
